

# FILINOV DMITRY

+7 (913) 064 21-57 | [dm.filinov@gmail.com](mailto:dm.filinov@gmail.com) | [Telegram](#) | [Leetcode](#) | [GitHub](#)

Data Scientist with a technical background and practical experience in machine learning, data analysis, and backend development. Specialises in computer vision and NLP tasks, including classification, detection, and fact checking. Have experience in creating complex solutions and participating in artificial intelligence competitions and hackathons.

## WORKING EXPERIENCE

|                                                                                                                                                       |                                                              |
|-------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------|
| <b>State of Children LLC</b><br><i>Project on segmenting forest fires on video using UAVs.</i>                                                        | <i>Online Internship Project</i><br><i>09.2023 – 01.2024</i> |
| <b>Siberian Generating Company, Novosibirsk Thermal Power Plant-2</b><br><i>Project to create a set of AI models for predicting fuel consumption.</i> | <i>Non-commercial Project</i><br><i>03.2023 – 07.2023</i>    |

## SKILLS

|                           |                                                                              |
|---------------------------|------------------------------------------------------------------------------|
| <b>Specializations</b>    | Big Data, Image/Video classification and segmentation, object detection, NLP |
| <b>Deep Learning</b>      | PyTorch, TensorFlow                                                          |
| <b>Computer Vision</b>    | OpenCV, Roboflow, Torchvision, YOLO                                          |
| <b>Data Visualization</b> | Matplotlib, Seaborn, Plotly, DataLens                                        |
| <b>Data Manipulation</b>  | NumPy, Pandas, PyTorch                                                       |
| <b>MLOps</b>              | ClearML, Docker, Docker Compose, Poetry                                      |
| <b>Backend</b>            | Flask, FastAPI                                                               |
| <b>Databases</b>          | SQL, SQLAlchemy, S3, Redis                                                   |
| <b>Other</b>              | Git, GitHub, L <sup>A</sup> T <sub>E</sub> X                                 |
| <b>Language</b>           | Russian (native), English (upper-intermediate)                               |

## ACHIEVEMENTS

|                                                                                                 |                                                                                |
